

Please follow this guide to connect to Hosted ASTS Bridge service to access the game environment of the MOEX Equity & Bond and FX Markets via Internet:

Make sure DNS service operates correctly

Run the Windows command line: press "**Win**"+"**R**" and type "CMD" in the opened window. Select "**nslookup game.moex.com**" in the command line window.

+ When the command is run, field "Addresses" contain the following addresses: 91.208.232.161 and 91.208.232.162.

- If after executing the command, you get an error instead of the list of addresses, please contact MOEX system administrator to check DNS.

Check the connection addresses

Execute consecutively the following commands in the command line window:

- To check availability of game servers of the Equity & Bond Market:
- telnet 91.208.232.161 15044
- telnet 91.208.232.162 15044
- To check availability of game servers of the FX Market:
- telnet 91.208.232.161 15040
- telnet 91.208.232.162 15040

+ After every command is executed, black screen with a blinking cursor should appear that means successful connection has been made. To execute the next command, press "**ctrl**"+"**C**".

- if the error message appears that says *«telnet is recognized as an internal or external command»*, please contact your system administrator to check accessibility of addresses and connection ports.

- if the error message appears that says *"Could not open connection to the host, on port: Connect failed"* please contact your system administrator to receive authorisation to access the pairs of addresses and connectivity ports.

Make sure connection setup is correct

We recommend changing the connection setup when the markets are closed and check in advance correct resolution of the DNS record "game.moex.com" and network accessibility of connection addresses.
